From Academic Press : Biogeochemistry of Marine Dissolved Organic Matter the online version of marine chemistry at sciencedirect the worlds leading platform for high quality peer reviewed full text journals soil is a mixture of minerals organic matter gases liquids and countless organisms that together support life on earth soil is a natural body called the Biogeochemistry of Marine Dissolved Organic Matter:

1 of 1 review helpful Informative and well integrated book By Huei ting Lin I am studying the dissolved organic carbon cycle DOC in the marine environment This book introduced important key issues regarding DOC methods of how to research about these issues and some interesting results The written style is easy to follow The chapters are well selected I always find what I need in this book and the information very well Interest in marine dissolved organic matter DOM is very high because it plays an important role in oceanic and global carbon cycling which in turn impacts weather Understanding the processes involved in the transformations of carbon phosphorus nitrogen and other major elements in the oceans has been a primary goal of marine biogeochemists and oceanographers over the past decade This book in 16 chapters with over 170 figures and tables reports on the major Hansell and Carlson have assembled a team of international experts to produce the definitive authoritative reference work on the chemistry and ecology of marine DOM Anyone requiring a key to the literature of marine organic geochemistry and contemporary DOM
