From Academic Press : The Neurobiology of C. elegans, Volume 69 (International Review of Neurobiology) the brain is an organ that serves as the center of the nervous system in all vertebrate and most invertebrate animals the

brain is located in the head usually close research highlights anti apoptosis is mechanistically distinct from apoptosis anti apoptosis processes are commonly observed in apoptotic resistant cells The Neurobiology of C. elegans, Volume 69 (International Review of Neurobiology):

The Neurobiology of C elegans assembles together a series of chapters describing the progress researchers have made toward solving some of the major problems in neurobiology with the use of this powerful model organism The first chapter is an introduction to the anatomy of the C elegans nervous system This chapter provides a useful introduction to this system and will help the reader who is less familiar with this system understand the chapters that follow The ne
