By William D. Nordquist BS DMD MS : The Stealth Killer: Is Oral Spirochetosis the Missing Link in the Dental and Heart Disease Labyrinth?

The Stealth Killer: Is Oral Spirochetosis the Missing Link in the Dental and Heart Disease Labyrinth?:

In today's cosmopolitan urban population more than 51 percent of those with root canal treated teeth probably have infection at the tip of their root. This figure represents millions of possible locations of dental infection. According to Dr Nordquist's research any source of bacteria with resulting chronic infection including periodontal disease in the mouth may potentially lead to heart disease and other systemic diseases. In this groundbreaking book Dr Nordquist
