0 of 0 review helpful Definitely a book you can't put down By TClearkin Well written and provides the reader a glimpse into the hardwork and dedication of health researchers and workers to keep us all safe The way it was written also gives us a view of how quickly a virus can get out and the panic it causes It doesn't disappoint on being a thriller whether it is in the discovery or the various people Guido me A fascinating story about the history of Ebola written by one of those who discovered it Popular science that reads like a thriller In the mid seventies Guido van der Groen and his colleagues at the Institute for Tropical Medicine in Antwerp discovered the deadly virus Ebola Forty years later the virus breaks out again in West Africa Why is this virus seemingly unstoppable Could About the Author Prof Dr Guido van der Groen is emeritus professor in Virology and former head of the department of Microbiology at the Institute for Tropical Medicine in Antwerp
